

# PROJECTS IN THE SCHOOL FROM PETROVCA

The school from the village Petrovca, district Singerei was in danger to be closed. The heating system was functioning bad, it was cold in the classrooms. The windows and doors were old and leaking. There was no foundation rain protection around the school building and the front steps were broken. With help of Ms. Brigitta Walder, Landquart and priest Erwin Benz, Baar we could install a new heating system and buy two heating boilers, build a foundation rain protection and repair the front steps. Hilfswerk Liechtenstein, Triesen financed the installation of new doors and windows.

**So, the school from Petrovca was saved!**

The official opening of the projects took place on October 19<sup>th</sup>, 2017 with the presence of priest Erwin Benz, Ms. Bettina Pelger-Sprenger and Ms. Beatrice Amann from Hilfswerk Liechtenstein.
