

# Day Care Center for Children “Saint Maria” in Grigorauca

The children who come to the Day Care Center for Children “Saint Maria” are the poorest children in the Grigorauca village; they come from socially disadvantaged or large families. The children receive a good basis for future career choices. Sewing, radio technology, woodwork, computer science, English, music, puppet theater and dance courses are all popular among them. In addition, the sports and playground not only offer a variety of different physical activities, but also contribute to children's health.

All the costumes were made by girls in the day care center.
