

# Day Care Center for Children "Saint Maria" in Grigorauca

Due to the outbreak of the coronavirus, the children were prohibited from visiting the center from March to September because of the quarantine imposed by the state government. Together with the educators, it was decided to continue taking the courses, but online so that none of the children endangered their health and remained in self-isolation at home. Thanks to modern technologies, online courses have been very interesting and productive.

Since September 88 needy children from Grigorauca may visit the center again; it makes them very happy.
