

REPARATION OF THE KITCHEN WING OF THE SCHOOL IN PETROVCA

The poor and unsanitary conditions in the kitchen wing of the school in Petrovca demanded a renovation. Thanks to the financial support of priest Hans Bock (through Catholic Parish Schierling), Germany, this problem was solved, and all the necessary work was carried out: dismantling the old and installing a new water supply and sewage system, laying new tiles on the walls and on the floor, purchase and installation of new kitchen equipment as well as other smaller works.

It should be mentioned that earlier a new ventilation system has already been installed in this kitchen wing. And thanks to the financial support of priest Erwin Benz, Switzerland, new furniture could be purchased for the dining room.
