

NEW FLOORS FOR THE SCHOOL IN PETROVCA

During the 26 years of the existence of Petrovca school, there has never been a major renovation or renewal here. In the meantime, the flooring in the classrooms had become more than deplorable; the old linoleum should have been replaced long ago.

Thanks to the support of Priest Erwin Benz, Mrs. Brigitta Walder, the Bischof-Bär family, Mrs. Gloria Rickenbacher and Mr. Marcel Dora (all from Switzerland) we were able to purchase and install 395 square meters of high-quality laminate - a Swiss product by the way, as well as the other necessary materials for installing the laminate.
