

DAY CARE CENTER FOR ELDERLY „SFINTUL PETRU“

The day care center for elderly „Sfintul Petru“ is working since October 1, 2008. Because of certain circumstances the center moved from the presbytery to a private house. Our local coordinator put her house at the disposal of the old people, so that they could be supplied and looked after. We received now new rooms for the center from the mayor's office. The rooms were repaired and furnished, so the old people feel comfortable and good. The official opening and blessing of the new rooms took place on December 6, 2013.

There are 28 old lonely ill people that benefit from the project now. 15 of them come to the center. The other 13 are bedridden people that receive the food at home; our old people bring it to them voluntarily. In the center the old people eat healthy, pray together, watch TV, talk, wash their laundry.
